

# MUGGINS MATH "SCHOOL SPECIAL" STARTER PACKAGE PLAN

2010  
Pricing  
Discounts

*We believe the key to schools and educational suppliers surviving this economic crisis is to extend a helping hand to each other in support of our American economy. All of our Muggins Math products are manufactured here in America. We have also created our own economic stimulus plan, the **Starter Package Plan**, which is designed to give all of the essential games and manipulatives for K - 5th and /or 6th - 12th at a **discounted price** from 5% to 15% in **classroom size quantities** for **small, medium, and large size schools**. Within this package is a plan that meets the educational and budgetary needs of any size school .*

*We suggest making the sets available through the Media Center for teachers to check-out in classroom size quantities to use with their classes. **Other games may be substituted for those listed as long as the total number remains the same. Please call with any questions or to discuss your selections.***

*Listed below are the details of each plan--**Small, Medium, and Large**--for **K - 5th and 6th - 12th**. On your purchase order be sure to specify **Starter Package Plan—Small, Medium, or Large—and K - 5th and/or 6th - 12th** as well as your game selections and quantities of each to receive this special pricing. **Shipping cost is 9% of the discounted total.** You may purchase as many packages as you wish.*

***Staff development** by the creators of the Muggins Math Series can also be provided to accompany these packages. Muggins Math Workshops have received nothing but rave reviews since their beginning in 1997. The consultants travel to your school or district and provide the training. It doesn't matter if your school/district is small or large, in a remote, rural area or large metropolis. The consultant fee for each day of training is \$1500.00. Travel expense is \$1200.00 for one day of training and \$300.00 for each additional day of training. Combine with other schools or districts nearby to reduce your travel expense. To order a workshop with the materials above, please call to discuss possible dates and times for the training which may be during the school day or on an in-service day.*
